RAS Consulting

Project Management

We are Certified Project Managers (PMI) with over 25 years experience in expertly managing operational projects or software development, delivery, installation, and beyond.

Software Development Management

We are versed in both traditional and agile software project management, experienced in designing, project managing, implementing, and supporting large software installations in office support services and corporate ground transportation for Fortune 500 companies.

General Project Management

As certified project managers we have the expertise to deliver any project on time, on budget, and with the right resources. Implementation of new solutions to cut costs and enhance workflows and efficiencies is our sweet spot.

Visit vimeo.com/channels/rasconsulting to hear Richard A. Schreiber, founder and CEO, introduce RAS Consulting.
